

Urban Sustainable Sanitation and Hygiene for All (USSH4A)

Status: Completed

Project Partner: SNV Nepal and Birendranagar Municipality

Project Area: Birendranagar Municipality

Project Duration: July, 2013 – December, 2014

Aim:

To improve health and quality of life by increasing access to sustainable sanitation and hygiene

Project Description:

The USSH4A Project focused on improving the health and quality of life by increasing access to sustainable sanitation and hygiene in the urban area. The project was funded by SNV Nepal and ENPHO acted as the Local Capacity Building Organization (LCB). The partners for the project are Birendranagar Municipality and the relevant stakeholders.

Project Outputs:

- Sanitation demand creation and behavioral change
- Sanitation services and business development
- Improving WASH governance, regulating and bringing stakeholders into compliance
- Improve fecal sludge and waste water management through treatment, disposal and re-use

Beneficiaries:

- About 15,500 local people

Project Achievements:

- Birendranagar Municipality (Ward no 1-12) has been declared as Open Defecation Free (ODF) zone
- Developed of Septic Tank Manual
- Preparation and implementation of school based BCC action plans
