Supporting Education and Environment Development in School (SEEDS)

Status: Ongoing

Project Partner: Impact Marathon Series, Aus Home
Project Area: Shree Kakani Lower Secondary School and Shree Saraswoti Secondary School
Project Duration: April 2017 to April 2020

Aim:
To develop school as WASH Model School

Project Description:
The SEEDS initiative envisions aiding selected schools to become exemplary models in terms of education and environment – functional and well maintained WASH facilities, classrooms, buildings, computer and science labs, library and sports facilities. After a thorough WASH assessment of various schools, Shreekhandapur Secondary School, Shreekhandapur, Kavre was selected as the first school for the implementation of the SEEDS Initiative. Feasibility study has been conducted in Shree Kakani Primary School and Saraswoti Secondary School in Nuwakot for the selection of next school. For this project, ENPHO collaborated with Impact Marathon Series (IMS); an England based organization which organized IMS marathon events to raise fund. The SEEDS Initiative capitalizes ENPHO’s expertise to adopt schools – initially focusing on the WASH facilities and ultimately developing the selected schools into exemplary models via both hardware and software interventions under the school-led paradigm. This year, ENPHO collaborated with Impact Marathon Series and Aus Home to conduct WASH activities in schools.

Project Outputs:
- 40 students trained on solid waste management and 30 trained and oriented on making homemade sanitary pad and MHM respectively;
- Feasibility study conducted in two schools in Nuwakot district;
- Wall paintings and plantation program conducted;
- 30 students;

Beneficiaries:
Total Beneficiaries from the project: 265 people
