**About this Training**

Do you want to learn how to plan affordable and context-specific citywide inclusive sanitation solutions? Be up-to-date on the newest developments in urban sanitation planning? Get to know best practice examples of inclusive urban sanitation systems in developing countries? If yes, this course is for you!

The ConCaD training aims to build the capacity of sanitation professionals including private sector consulting firms and individual consultants to conceptualize, plan, design and facilitate city-wide inclusive urban sanitation services. This will help meet the rising demand from governments, international financing institutions and development partners for sanitation projects that address the diverse needs of all citizens and business, in both planned and unplanned areas.

**Target Audiences**

The targeted audiences are sanitation professionals working with government organizations, I/NGOs, consulting firms, freelance consultants working on or planning to work for peri/urban sanitation projects in Nepal and surrounding regions.
Syllabus

The three days course will be delivered by pool of experienced sanitation experts using presentations, table discussions, group work exercises, role play, quizzes, videos and a project bidding simulation. The participants will be provided with handouts, access to a curated online resource package of reference documents, tools, books, case studies, videos etc.

<table>
<thead>
<tr>
<th>Day 1</th>
<th>Using Diagnostics</th>
</tr>
</thead>
</table>
| 380 minutes | - Introduction of **basic principles** of inclusive urban sanitation.  
- **Diagnostic tools** to evaluate existing sanitation services.
