The Suaahara II frontline workers are optimally disseminating information on prevention from COVID-19 at the communities using mobile technology, as a solution to mobility restrictions arose due to lockdown. They are continuously providing counseling services on COVID-19, health, nutrition, and water, sanitation, and hygiene (WASH).

When the lockdown was loosened, realizing the risk of this disease for 1000 day mothers, **Ms. Satya Padhya**, Community WASH Volunteer, Bajura along with other team members had determinedly provided counselling services at the doorsteps of targeted households taking necessary preventive and control measures against COVID-19 disease.

We would like to acknowledge the dedication and daring effort shown by all the frontline workers, despite this pandemic situation.

**A huge round of applause for our WASH Heroes !!**
