

Training Outline

TRAINING ON WASH AND CLIMATE CHANGE

LENGTH: 3 Days

WORKSHOP DESCRIPTION:

With the frequent change in pattern in weather condition and subsequent issues related to it, climate change has been a topic for discussion. With the huge and wide area of impact, this has been a concern as a cross cutting issues for different sectors. One of such area/ sectors with the huge impact of climate change is Water, Sanitation and Hygiene (WASH). It a surge in temperature, the availability and accessibility for the WASH services has been greatly impacted. The sudden occurrence of climate induced disaster is other concern that impact on WASH sector and services.

Climate change is a pressing global issue that requires urgent action to mitigate its impacts and ensure a sustainable future for generations to come and thus the package for the preparedness and mitigation measures related to such issues and events.

OBJECTIVES:

The main objectives of this training are:

- To understand the concept of climate change, WASH and climate actions.
- To be able to plan and implement the climate actions strategies and interventions related to mitigation, adaptation and resilience.

PARTICIPANTS:

The training is oriented towards participants who are:

- The anticipated primary target group for the training are staffs from the development partners.

METHODS OF INSTRUCTION:

Participatory approaches are used to engage and actively involve everyone in the training. This training includes theory, demonstration, practical exercises, and varied discussion types to share experiences.

CONTENT:

The following is a list of the topics to be covered in the Workshop.

- Climate Change- Conception
- WASH and Climate Change
- Water Conservation
- Water Quality
- Climate Resilient Water Safety Plan

- Sanitation System and Latrine Use
- Waste Management
- Hygiene
- Climate Action in WASH
- Planning and Implementation
- Approaches and Initiatives

OUTCOMES:

Upon the completion of the workshop participants will be able to:

- To learn about rationale for climate change conception along with the myth busters related to climate change
- State national initiatives relating to Climate Change in WASH
- Discuss the concept of water conservation for the optimum use of water.
- Explain the water quality and PoU options
