Jhapa

Training on Introduction to Faecal Sludge Management (FSM)

About the Course

This course is designed to strengthen participants' knowledge and skills in Faecal Sludge Management and introduce the concept of Citywide Inclusive Sanitation. The training aims to promote public health by ensuring the safe management of human excreta, maintaining a clean environment, and breaking the cycle of disease transmission.

The event is jointly organized by Water Supply and Sanitation Division Office (WSSDO), Jhapa and Environment and Public Health organization (ENPHO).

Targeted Participants

Municipal Officials

Development Partners

Private sectors working in sanitation

Course Attraction

- ✓ Global and Local Scenario of Urban Sanitation
