

Factsheet of Faecal Sludge Management at Khadak

Khadak Municipality has a trench for temporary management of faecal sludge. It was established on 2018 under SNV's SSH4A project. Later, second trenching site was constructed under WASH SDG project by SNV Nepal in support of Directorate-General for International Cooperation (DGIS) in 2021. It is currently being managed by Khadak Municipality.

This factsheet has been generated based on the survey conducted on April, 2024.

Components in Treatment Facility

The facility has trenching method only for faecal sludge treatment.
