

Online Training on Chlorination of Drinking Water in Emergencies

A self-learning online course

1st - 29th August 2025 | 2:30 - 3:30 PM

3 zoom session on Friday (1, 15, 29 Aug)

ABOUT THE COURSE

This course aims to enhance participants' knowledge on chlorination, including the concepts of free, combined, and residual chlorine. It also builds practical skills in preparing a 1% chlorine solution and performing chlorine dosing for high-dose disinfection (shock chlorination) to eliminate harmful pathogens from well water systems.

KEY CONTENT

- 1 Free, Combined and Used Chlorine
- 2 Things to consider before chlorination
- 3 Chlorine dosing calculations
- 4 Factors affecting chlorine effectiveness
- 5 Frequently asked question on chlorination

TARGET PARTICIPANTS

- Water supply scheme technicians,
- WASH Project Implementers
- Officials interested to learn chlorination
