

TRAINING ON DRINKING WATER QUALITY TESTING

7 - 10 April 2026 | 10:00 am - 5:00 pm
Kathmandu

About the training

Only for Nepali Participants

This training is designed to build practical knowledge and hands-on skills in drinking water quality testing. It aims to equip participants with the necessary competencies to conduct physical, chemical, and microbiological analysis of drinking water through a combination of theoretical learning, live demonstrations, and hands-on practical sessions using portable water testing kits.

Course Covers

- Concepts of safe water and clean water
- Drinking water quality standards
- Practice physical, chemical, and microbiological parameters using potable water test kits
- Result interpretation

Target Participants

- WASH implementing professionals working in drinking water supply,
- Government officials responsible for monitoring community water schemes,
- Laboratory technicians/ assistants involved in water quality testing

Training Fee

Nrs. 11,300/-

Join our hands-on training and learn to use portable test kits to ensure safe drinking water for all.

Application Deadline
