

Workshop Outline

Climate Resilient Water Safety Plan (CR-WSP)

LENGTH: 4 days

WORKSHOP DESCRIPTION

This package focuses on building climate resilient water safety plan in water and sanitation supply schemes. Accessibility of water along with water quality is a major concern in current scenario. Focusing on it, water being supplied by water and sanitation supply schemes is also a major concern. With the variance in climate which has a huge impact in the water quality and accessibility, the package focuses on training the trainer on the topic to facilitate and develop the required water safety plan in the community.

OBJECTIVES

Upon completion of the workshop participants will be able to:

- To enhance knowledge on Climate Resilient Water Safety Plan
- To capacitate the participants to facilitate training on CR-WSP
- To facilitate creating draft CR-WSP of Water and Sanitation Supply Scheme

PARTICIPANTS

The workshop is oriented towards participants who are:

- Working in water, sanitation and hygiene or community development
- Currently implementing community WASH projects to include water safety plan in water and sanitation supply schemes

Participants may be:

- Local WASH implementers
- Decision makers who are planning or implementing water safety plan in water and sanitation supply schemes
- Non-governmental organizations (NGO), international NGOs, government agencies, or individuals implementing water safety plan in water and sanitation supply schemes

In the package, participants will be able to gain knowledge and information on 'water safety plan' along with the climate resilience perspective. To this, participants will be demonstrating and practicing in steps of water safety plan including a field visit and prepare a draft of water safety plan of thus visited water and sanitation supply scheme.

METHODS OF INSTRUCTION

This participatory style workshop includes theory, classroom exercises, open discussion, demonstrations, simulation, and hands-on practice in the workshop along with the field visit of a water and sanitation supply scheme. Active participant engagement in learning activities is highly encouraged.

CONTENT

The following is a list of the topics to be covered in the Workshop.

- Water quality and water-borne disease
- Intro to climate resilient water safety plan
- Water safety plan steps
- Water safety plan team formation and analysis of water and sanitation supply scheme
- Hazard identification and risk analysis
- Control measures and further steps
- Water quality testing
- Mass Chlorination
- Multi-barrier approach and Point of Use options
- Preparation for field visit
- Instruction for WSP preparation
