

TRAINING ON WASH & CLIMATE CHANGE

ABOUT THE TRAINING

Join this training to gain practical knowledge and skills for addressing the growing impacts of climate change on public health and the WASH sector, including its services and infrastructure. As climate-induced disasters continue to threaten community well-being and slow progress toward the Sustainable Development Goals (SDGs), this training offers a timely opportunity to explore practical, locally relevant, and policy-driven approaches for identifying and implementing climate-responsive strategies in the WASH sector, with a strong focus on resilience.

KEY CONTENT

- Linkage between WASH and climate change (CC)
- Impact of CC on water accessibility and its mitigation
- Climate action in WASH Mitigation Adaptation and Resilience
- Global and National Advances in Climate Interventions
- Global and National policies on WASH and CC
