

Training Event Hosting/Facilitation

Expert-led learning experiences delivered in person, online and in blended formats to strengthen capacity and support your organization's goals.

What we do?

We deliver practical learning solutions that strengthen technical knowledge, professional skills, and institutional capacity. Our training services are being facilitated by experienced trainers, including both internal and external resource persons, and are delivered through participatory approaches that promote engagement, reflection, and practical application. ENPHO also offers consulting support to organizations, projects, and programmes requiring tailored technical sessions and capacity-building through customized training events.

The ENPHO Training Center offers three types of training services: Scheduled Training, which is planned annually by ENPHO and opened for registration at the beginning of each year; On-Demand Training, which is designed and delivered in response to the specific needs of organizations and institutions; and In-house Project Training, which is implemented under ENPHO's own projects. To expand access and flexibility, we also provide online learning through ENPHO's Learning Management System (LMS), virtual training sessions via Zoom, and joint training events with like-minded organizations.

Our Reach

How we do it?

- Develop an annual training calendar with highly demanded training events and announcements through the official page and social media platform
- Curate and consolidate training demands from partners, clients and in-house projects
- Customize/tailor training sessions and materials for effective and meaningful training delivery
- Organize/Host training events independently or jointly with partners or client organization.
- Prepare event completion reports incorporating trainers' and participants' reflections and feedback.

Planning a training event?

Reach out to ENPHO for professional hosting, facilitation, and customized learning solutions that match your organization's goals.
